This table is a work in progress - hopefully we will invent a more easily readable display format someday. The main data sources are Jimmy Sproule's Service Record, Ancestry.co.uk for incoming passenger lists, and Find My Past for outgoing passenger lists. The data bases do not cover all passenger lists, and there are transcription challenges galore - all of which means that we can say definitely that the highlighted voyages happened, but absence of data does not mean that something did not happen!
