This “CV” is an exact copy of one found in Dr Frank Rex (Jimmy) Fletcher’s papers which had been typed by him, but is now quite faded.

In the same papers are a “Record of Service” for Major F.R.Fletcher RAMC (23045) (in his hand) which is a lot more detailed than the above. Also two further documents listing postings / travel etc. – probably with a lot of repeat information. All these papers have been scanned into a PDF, into which the relevant entry from “Commissioned officers in the medical services of the British Army, 1660-1960” by Alfred Peterkin has been added.
